LIST OF TABLES AND FIGURES

Table 1 shows the management practices carried out in the raised bed.

Table 2 shows the extension activities conducted in the communities

Table 3 Shows the activities carried out in the seed bed gardens.

Table 4 shows the activities conducted in the during food supply

Table 5 showing the seed viability carried.

ABSTRACT

The field attachment was carried out from Ngolereit sub-county located in Napak District from 28th of Feb to 03rd of May/2022.

The exercise was done in Ngolereit Sub County which involved the following activities. Crop management practices were carried out during my stay at the fields such as, carrying out seed viability, raising of beds, clearing farmers' gardens to receive crops, plus identification of diseases which affects the crops with the corresponding treatments.

During the IT under crop section where I was allocated , I carried out various activities that included field marking , planting different types of crops , crop protection , pests and disease identification and their control measures , gap filling, etc.

I also gained skills and knowledge in crop production like identification of various types of seedlings in the raised bed, field marking techniques, identifying different types of crops, identification of pests and diseases in crops and the common tools used in crop.

While in the training , I learnt a lot of things both practically and theoretically that gave me more knowledge to add to that one that we learnt from class about crop production , lot of activities were carried out from the field with maximum care to avoid problems during data analysis.

I wish to request the administration of the Ngolereit sub county to improve on the infrastructures location such as raised seed bed near the market centers in order to ease transportation of seedlings and storage of crop produce and also open up the irrigation systems to avoid wasting of crops and water shortage for seedlings in the raised seed bed.

Also Ngolereit sub-county should strongly support the local farmer on their savings by putting some money on their saving boxes so as to motivate them and pay the workers in time to avoid them getting discouraged from doing their activities being allocated by the sub county

CHAPTER ONE:

1.0 Introduction

Industrial training refers to the work experience that is relevant to the academic and professional development of a student before graduation. It is usually compulsory module for all students at the end of first year.

It is a program which aims to provide supervised practical training with aspect in specified time frame. This training can be carried out either in government organization or in private section.

1.1 Background

The Ngolereit sub county is located in moroto to Soroti high way and It is one of the old sub county in Napak district and It has also produced kangole town council which was part of It.

Founded in 1980, it is one of the sub counties in Napak District with many (NGO). Which offer the local natives with a lot of donination

1.2 Location

Ngolereit Sub County is located in Karamoja region and specifically in NAPAK District where it is located. It serves almost the five parishes in the districts of Napak in karamoja.region

1.3 Vision

To ensure that every human being in Uganda is self-sufficient, confident and able to live with dignity in line with freedom of worship.

1.4 Mission

To ensure that communities in Karamoja are more self confident in demanding for their rights and more services in the government and create employment to people
