**CLIMATE CHANGE MITIGATION OPTIONS BY THE COMMUNITY  
A CASE STUDY OF NAMASAGALI SUB-COUNTY COMMUNITY, KAMULI  
DISTRICT**

**NAME: LWANGA DERRICK  
REG. NO. : BU/UG/2018/2261**

**A RESEARCH REPORT SUBMITTED IN PARTIAL FULFILLMENT OF THE  
REQUIREMENTS FOR THE AWARD OF A DEGREE OF BACHELOR OF  
SCIENCE IN NATURAL RESOURCE ECONOMICS OF BUSITEMA UNIVERSITY.**

**MARCH, 2022**

## **DECLARATION**

I, LWANGA DERRICK, do declare that the work presented herein is original, and has not been submitted for any other degree award to any other university.

Candidate's Name: **LWANGA DERRICK**

Signature: .....

Date: .....

## **APPROVAL**

This is to certify that this research has been done under the supervision of:

..... Date .....

**Mr. SSUUNA JAMES**

(Supervisor)

## **DEDICATION**

This report is dedicated to my beloved Mother, Ms Busingye Anne, Grandmother, and Ms Busingye Eunice whose encouragement and selfless sacrifice enabled me to obtain University Education.

## **ACKNOWLEDGEMENT**

Above all, I would like to thank my God for his untold and all time grace that gave me enthusiasm to start and finish this report work.

It is not possible to mention everyone whose contribution in one or way or another has enabled me to complete this piece of work, suffice to note is that I am sincerely grateful to all those who rendered their assistance to enable me accomplish this task.

Nevertheless, I wish in a special way to extend my sincere gratitude to my Supervisor, Mr. Ssuuna James whose constructive guidance and valuable comments enabled me to complete this dissertation would have been undoubtedly difficult above all recognizing all his support to me during my stay at Busitema.

I also wish to thank in a special way my beloved mother for the financial support and prayer she gave me while at university and through writing this dissertation.

I would also like to extend my sincere gratitude to all the lecturers in the department of Natural Resource and Environmental Economics for the knowledge they imparted to me that has helped me to complete the writing of this report.

My heartfelt thanks go to the citizens of Namasagali Community for all the support and coordination they have rendered me during my stay at campus and throughout my research. Mostly indebted to Pr Bwiso Ronald, Abitegeka Margret, Serugo William, Erojobo Samuel, Nishaba Agatha, and a number of friends plus my colleagues for all the support, courage and cooperation they have given me during my stay at Busitema University.

Finally my gratitude also goes to the government of Uganda through Busitema University for the scholarship without which my study at Busitema University would have been impossible.

## **ABSTRACT**

This study uses Namasagali Sub-county; as a case study in investigating the climate change mitigation options by the community with emphasis on; how climate change has affected the people, the contributing factors to climate change, and the measures to mitigate the effect of climate change. The study uses semi-structured interview guides to collect data from the community, secondary data from published reports, journals, books, and conventions. The study revealed that climate change imposes many effects on livelihoods of the people living in Namasagali, including drought and heavy precipitation. Furthermore, the existing local and institutional strategies are not sufficient and sustainable to cope with climate stresses; people's adaptability is constrained by unavailability and expensiveness of agricultural inputs, unemployment, land scarcity pests and diseases to crops and animals and water shortages in the Sub-county.

This study suggests persistent need to address these challenges both short and long-term policy perspective by the people, government and institutions. Undertaking Climate-smart agriculture provides a framework for putting in place comprehensive policies, adequate institutions and proper governance to implement sustainable, climate-sensitive development strategies.
