Faculty of Science and Education.

2020

**Declaration**

I **TAKUNYA KENETH** Registration Number **BU/UP/2017/1803** hereby declares that this Project Report is original and has not been published and/or submitted for any other degree award to any other University before.

Sign..... Date: .....

**Approval**

This Project Report has been submitted for Examination with the approval of my loving supervisor.

Signed.....Date.....

**Mr. OBOTH ANDREW**

Department of Computer studies

Faculty of Science and Education

Busitema University

## **Dedication**

This project work is dedicated to the **ALMIGHTY GOD** for making me to be able to start up and successfully finish in sound health. Also to my guardians as well for being supportive in the course of this project work both financially and spiritually, to all my church members for the moral support and the spiritual support with the sincere prayers they made for me to attain this success and to my close friends for being supportive and kind to me during the course of this project work. Finally, to my dear brothers and sisters for the kind of support they rendered to me during this work. May the almighty God bless you all abundantly.

## **Acknowledgement**

My sincere gratitude goes to **THE ALMIGHTY** for his abundant mercies, guidance and protection over me throughout the course of my project work. All thanks to my beloved **MUM Ms. KADONDI SARAH** and my ground father **Mr. TAKUNYA WILISON** for the profound help and support to me during the course of this project work.

I would really say words are not enough to express my profound gratitude to my beloved Supervisor **Mr. OBOTH ANDREW**, the Head of Department of Computer Studies **Dr. RICHARD ANGOLE**, and all the Lecturers in the Department of Computer Studies as well as the Non-Teaching Staffs of the Department of Computer Studies especially the Lab Technicians for their support and inspiration in one way or the other. May God bless you abundantly (Amen).

Thanks goes to my beloved brothers (**NINDU DAVID, TAKUNYA GEOFFREY**), sisters (**NAIGAGA DINAH, WENENE SUZAN and KATAIKE BRENDA**), family as a whole and all my friends for their unconditional support and their patient to me in the due course of this research project. All thanks to my sincere colleagues in the computer class 2019/2020 most especially **Mr. BADAZA GEORGE Mr.OKETCH DENIS ,Mr CHEBET ISAAC ,Mr.OLOBO JULIUS and Mr.BYARUHANGA MOSES** for your maximum support and the whole fraternity of Nagongera Campus for their immense contribution and unconditional support throughout the course of my project work. May **God** in his Divine favor bless you all (**Amen**)

# Abstract

This research was based at improving bookings and minimizing the cost at hotel. One of the problems cited at the hotel is that the hotel used to advertise their services on posters and on streets. For this case, the main purpose of the study was to develop an online hotel reservation system for the hotel to minimize these problems.

The main method used was the RAD from SSADM where the functional modules are developed in parallel as prototypes and are integrated to make the complete product for faster product delivery. Since there is no detailed preplanning, it makes it easier to incorporate the changes within the development process.

The major tools that were used in the implementation an Online hotel reservation system are ;

- (i) MySQL database server.
- (ii) Hypertext Pre- processor (PHP)
- (iii) Hypertext markup language (HTML)
- (iv) Cascading style sheets (CSS) and JavaScript.

Therefore an online hotel reservation system was developed to solve the problems that the hotel is facing due to use of manual system in the way that the system enables the hotel to handle booking activities online and meet the satisfaction of their customers .

# CHAPTER ONE

## 1.0 Introduction

According to Afriyie (2012), hotel reservation means booking hotel services in advance or before reaching to the destination. Through this, a client is able to access hotelier services such as rooms to pass the night, food among others depending on his/her own wish in time to avoid getting frustrated when what is needed is over or fully occupied.

Now Bidgoli (2011) defined online hotel reservation system as the software application /tool to store, publish and update the dynamic data about the availability and prices of the hotel accommodation, and provides users with a regular reservation.

Previously Customers were mostly being constrained with the usual practice where they had to look for a hotel more so when arrived in the particular place, walk in physically and find out whether there is a service one may wish to book. In case that there is nothing, a customer still continues to move to next closest hotel to enquire once more and this could make customers really stranded Chen (2013)

Therefore, the study carried out aimed at developing an online hotel reservation system to enable customers book for whatever they need from wherever location they are before lodging into the hotel. The system is to allow for easy access and retrieval of information and reporting. With such a system in place, Mbale Travelers-In Hotel would be more competitive in Mbale.

## 1.1 Background of the study

Mbale travelers-in is a hotel well known for providing its customers with clean and comfortable place to stay for a short period of time say one, two days or a week, place for refreshment, entertainment and protection of the visitor. It's a private hotel running in Mbale town, Eastern Uganda near Mt Elgon and located along Naboa road opposite DFCU bank. The hotel is employing more staff to cope up with the increasing amount of paper work and hotel payments by the clients in booking all over the country. The hotel currently uses the manual system to hold all external and internal correspondence relating to clients and staff. A lot of documents concerning different payments and information are labeled and stored in cabinets at the hotel. For security purposes,
