## ABSTRACT

Here a reader is introduced to what is going to be talked about in the report

**Chapter one** includes; general information, objectives of the study, methods used in data collection, historical background, geographical distribution of the farm, location, vision, mission, services offered, organizational structure of the farm and farm resource identification and use. **chapter two** includes; Activities done at the farm for instance poultry management practices like vaccination, brooder management, feed formulation, record keeping, egg collection, feather picking **Chapter three**: It includes the skills and qualifications attained, responsibilities undertaken, attachment influences to the future career, core relationship to classroom knowledge, challenges faced and solutions. **Chapter four**: Includes recommendation and conclusion where a student is meant to deduce what is learnt in the training and give advice to the farm, appendices where a student is supposed to include supporting documents like photos, graphs, tables.

## CHAPTER ONE: INTRODUCTION.

### General Information

A case study is a holistic study that investigates an occurrence within its natural settings specifying particular terms in general details. It involves a detailed analysis of a single farm and make generalizations about its enterprise. It involves application of farm business management and economics to make proper decisions in order to maximize profits. Here a researcher needs to give learnt advice to the farm manager on what is ought to be done in order to improve farm's performance. Thus as a student needs to relate the theoretical aspects learnt in university and compare with the field observations to make a good conclusion.

### Objectives of the study

- To enable students, make actual decisions about problems faced by the farm, groups, individuals, thus enabling a student familiarize with the rules, guidelines and procedures used.
- To enable students, interpret farm financial statements
- To equip students with skills and knowledge for farm planning, budgeting and farm reorganization.
- To enable students, make an inventory of farm and community resources
- To prepare students for future scientific agricultural research projects in Agriculture and other Agribusiness related aspects
- To enable students and the community at large to appreciate the value and use of farm records for analysis.

### Methods used in data collection

#### Interview

Here I had a dialogue with the farm owner, manager, and workers at the farm.
