CLASS NO.
ACCESS NO. FAA 1420

ACKNOWLEDGEMENT

My deepest gratitude goes to God Almighty who gave me all the provisions during the training as there was never lack or wants throughout the training.

I appreciate DDLG for accepting to offer me a place where I could develop and learn new skills from and also Busitema University Arapai campus where I have been trained in animal production and management course.

I would also like appreciate all the lecturers and staff at the university and also at DDLG who offered a helping hand towards the training.

Lastly, my utmost appreciation goes to my relatives and friends who provided the encouragement for me to continue and pursue this education.

May the almighty God grant you all blessings.

ABSTRACT

The industrial training which was carried out was meant to expose students to practical skills in the field environment as they translate the knowledge and skills they obtained from school into the field experiences. This also enables the students get a feel of the required skills and potentials needed by employers in the job market hence one of the very important academic activities that need to be done before one is awarded a certificate in their field of specialty.

This year's internship started on the 28th Feb 2022 up to 6th of May 2022 equivalent to ten weeks over which plenty of activities were carried out under the production and marketing department specifically in Kangai sub county one of the lower local governments in Dokolo district in northern Uganda with direct supervision of the DVO DR. Opondo Patrick.

Kangai Sub-county is located in the southern part of Dokolo District about 10 km from Dokolo-Amolatar road. The production department of the sub-county was established with the aim of improving the production and productivity of livestock e.g. .Bovines, Caprines, Porcines, Ovine, Aves, among others.

The department is headed by the D.P.M.O with the help of sector heads such as the D.V.O, D.A.O, and DFO at the District and at the Sub-county we have the Agricultural officer, Fisheries officer and Assistant Animal husbandry officer.

This report is made of 4 sections or chapters. Some of the activities carried out included monitoring of agricultural projects, livestock data collection, livestock treatments and vaccinations, farmer trainings, meat inspection and ante mortem inspection, livestock parasite and disease surveillance, farmer home and farm visits and many other duties assigned by the sub county authority throughout my stay in the sub county.

Some of the skills got during the internship include gaining of interpersonal skills, gained skills in carrying out proper disease diagnosis, gained skills on general animal management, gained skills on good communication among others while some of the challenges seen included the poor road network that caused delays in reaching the farmers, the poor farmer attitudes towards trainings and also high expectation from the extension workers, there was also a challenge of no veterinary input dealers in the sub county.

In conclusion therefore, the internship was a success and some recommendations include the university improving on communication with the institutions training students during internship to help smoothen the exercise.

CHAPTER ONE

1.0 Introduction

Industrial training is an essential component of the curriculum that each student in higher learning institutions has to undertake in order to get a feel of the practical relating to one's course and also it's an academic requirement that needs to be fulfilled before an award of a certificate. Busitema University as one of the institutions of higher learning allocated a period of ten weeks that started on the 28th February up to 6th May 2022 for us the students to be in the field. Just like other universities and colleges, students got attachment to farms, companies and other organizations where they carried out different activities in relation to their profession. The industrial training was carried out in Kangai sub-county in Dokolo district local government under the production and marketing department. This report therefore describes the activities implemented, the skills and knowledge gained, the challenges faced during the course of the internship, the conclusions and finally the recommendations.

1.1 Objectives of the industrial training

The objective of this internship were to;

- Help build confidence in the students pertaining delivering of services to the farmers.
- Help enable the students to translate their class room skills and knowledge in to the practical skills in the field.
- Helps the students to gain relevant skills from the field that they may have not obtained while at school.

1.2 Back ground of the place

Kangai sub county local government is located just a few kilometers south of Dokolo town along Amolatar high way. It has a total land area of 243.3 km² and is bordered by Kwera and Okwongodul sub counties in the north, Kaberamaido district in the east and Adeknino Sub County in the south. It has five parishes which are Ayuni, Akurulango, Adwila, Chwagere and Angwenya with a total number villages being 44. The sub county is characterized by having two seasons i.e. the wet and dry season.
