DEDICATION

To my biological father Mr. Kulany E.L Bomet and family and my supervisor Mr. Tonny Chemei and family, for your encouragement, counsel and continued support through all times both ideally, materially, financially and through prayers. May God richly bless you.

To my dear mother, brothers and sisters for your love, care and support both materially, ideally and financially. May God grant you his blessings Amen.

And to all the Christian Union family of Busitema University Arapai Campus whose continued prayers and willing support has natured me to pray and serve the Lord through a sincere and honest service to the community around me. It is my sincere prayer that the good Lord continues filling you with the grace to pray, evangelize, and the grace to carry on with ministry in Jesus' name, Amen

ACKNOWLEDGEMENT

First, to the almighty God for his love, care and protection throughout the period of industrial training

I am grateful to all the executive and staff of Kaproron town council with whom I worked with for the whole course of my industrial training and the full deliverance of my ability to work with them. They include among others, the Town clerk, Town mayor, Town council extension workers and the Technical Support Staff (TSS), and to my field supervisor Mr. Chemei Tonny for all the kind support that they rendered to me during the industrial training.

I also extend much appreciation to the management of Busitema University Arapai Campus and to all lecturers of crop production and management department whose effort has made me grasp most principal ingredients to my course.

I am thankful to fellow Kaproron town council intern students Esau and Jacob from Busitema University whose company did not only comfort me but helped me build a good social character.

ABSTRACT

This field work report is a presentation of all activities that I carried out in Kapraron Town council an Agricultural local government organization focused in the implementation of the extension service and rural nutrition program whose major objective is to improve the farmer's agricultural productivity in poverty-stricken areas and improve on the farmer's livelihood. K.T.C extension team also aims at empowering the farmers to succeed in the economy and strives to promote positive economic and social change by attaching more value to promote economic opportunities for agriculture, enterprises and communities through innovative application of sound business practice.

The objective of the industrial training was to allow me (student) to execute all theoretical class work, relate and apply it practically in the field, to equip me with a good social character and to help me build the love for agriculture related work, to gain experience in community work, sharing ideas with the community to help them become the best version of themselves in fighting poverty through having adequate knowledge in agricultural production, capacity building by training them on good agronomic practices, to acquire practical experience in planning, implementing and evaluation of community work in relation to livelihood among others.

During the course of industrial training, I was under the department of Agricultural extension where I worked together with the technical staff in educating the farmers on Enterprise selection and proper growing and maintenance of maize, beans, Irish potatoes, Coffee and in raising of vegetable nurseries for Cabbages, tomatoes, egg plants, onions and carrots in all the 7 wards of the town council. I also educated and advised farmers on pest and disease control.

Methodologies such as observation, interviewing and literature and tools like pruning saw, hoes, pangas, wheelbarrows, pegs and strings, watering cans, spades and rakes were used in carrying out demonstrations and dissemination of information to farmers.

The industrial training was successful as I was able to interact with community members learning from each other and as well obtained special skills like Public relations skills, conflict resolution skills, communication skills and practical skills on agronomy

CHAPTER ONE

1.0 INTRODUCTION

This is basically an academic report based on activities that i carried out during the industrial training at Kapraron town council, Local government extension organization. The program targets Agricultural producing and poverty-stricken areas of K.T.C in Kween district by providing the necessary technical knowledge to the farmers and improving farming through trainings offered to the communities on good agronomy practices. While at K.T.C, I was under the supervision of the Program Officer Mr. Chemei Tonny who guided and trained me on various aspects of agronomy.

1.1 GENERAL OBJECTIVE OF INDUSTRIAL TRAINING

- To allow the student to help the community become the best version of themselves in fighting poverty through dissemination of information on good agronomic practices and as well equip the student with practical experience in the field of agriculture.

1.2 SPECIFIC OBJECTIVES OF INDUSTRIAL TRAINING

- To produce practically qualified, skillful and empowered extension workers who love to work, with a good social character and with a broad mind of innovativeness.
- To execute all theoretical class work, relate and apply it practically in the field.
- To equip the student with a good social character and to help the student build the love for agriculture related work.
- To gain experience in community work, sharing ideas with them to help them become the best version of themselves in fighting poverty through educating children, capacity building by training them on good agronomic or farming practices.
- To acquire practical experience in planning, implementing and evaluation of community work in relation to livelihood.
