ABSTRACT.

As usually, Busitema University Arapai campus, under the faculty of Agriculture and Animal science sends out students to various organizations to get field trainings especially those attached to agriculture in order to attain much needed experience in the area of agriculture. The duration of the training is ten weeks.

I was attached to Adjumani district local government under veterinary department under the guidance of D.V.O.

A lot of activities were carried out, orientation of the students, spraying of animals against ectoparasites at various dates, treatment of animal against photosensitivity, vaccination of chicken against gumboro, meat inspection at various dates, training of farmers on diary production, vaccination of chicken against Newcastle at various dates, field visits in poultry unit, piggery units and goat units at various time, silage making, preparation of micro indigenous organism (I.O.M), vaccination of cattle's against black quarter and anthrax, treatment of urinary tract infection, (U.T.I), Castration of gilt pig, construction of crush, field visits in diary units at various dates involving taking of body temperature, checking of ticks, feeding of pigs with silage, land marking, prophylactic treatment, deworming of animals, treatments of goats, vaccination of dogs against rabies at various places, operation of bull animal, and vaccination of chicken against fowl pox at various places.

1.0 CHAPTER ONE:

3

INTRODUCTION.

This chapter present information about the organization the field work was carried in. It highlights on the background of the organization focusing on the historical background, location, aims or objectives of the organization and the key activities of the local government. It's also presents a brief background to the field work focusing on the purpose, objectives and expected outcomes of the fieldwork. Background. Adjumani district local government was pronounced a district on 17th July 1997.

1.1: Location.

Adjumani district is located in the northwestern region of Uganda between latitude 31, 24" and 32,4 east of green witch line and latitude 2,53" and 3, 37" north of the equator. Lies on eastern bank of Albert Nile.

It was originally one of the three counties in moyo district. The box address of adjumani district local government is 2 Adjumani.

Within adjumani local government it main focus are on agricultural production department that is to say veterinary department, crop department, forestry department and among others.

I was attacked to veterinary department under this department the farmers benefited through treating their animals, giving advisory services and training on the animals diseases.

Adjumani local government is organized in the following departments.

Production and marketing.

This department handles issues related to agriculture in the district. It handles issues of the livestock, crop production and marketing.

It is where veterinary department where am attacked to.

Community services. This department ensures the wellbeing of the community members in the district. It is handles by community development officer and secretary for community services from political wings.

Technical services. The work of this department is to ensure functionality of the keys infrastructure within the local government including water sources, latrine, roads and schools, **Health services.** This deals with health issues it is where the drugs is located.

Planning and finance.

This department falls under the accountant and secretary finance from political wings. It is much concern with budgeting in the district.

Administrative. This deals with administrative issues and it is headed by COW and LC V chairman.

1.2: Objectives of the field work.

As partial fulfillment for the award of diploma in animal production and management in busitema university Arapai Campus, and this field work was deemed necessary. It's keys rationales includes providing opportunity for the field workers to translate the lecture (theory) in to practice and obtain practical working experience in the field.

1.3 Expected outcomes.

Worked together with DVO to established demonstration site.

Expected to give submit report on the assignment accomplished.

1.4: Methodology.

During execution of this field work the following methods were used.

Observation: Which was used mainly during orientation and at fields?

Brain storming: Especially during training of farmers on diseases controlled of animals.

Demonstration: This involves hands on practical participation with farmers especially on silage making.

Group discussion: This was used mainly during trainings where farmers were divided in to groups to discuss issues related to the area of training.
