DEDICATION

With great pleasure and honor, I would like to dedicate this report to my parents Okedi William and Imudu Teddy for their generously and tireless labor towards payment of my tuition in my studies.

In a special way I also dedicate this report to my dear brother Okedi Moses , lecturers and my fellow colleagues who worked hand in hand in giving me knowledge during industrial training that may the almighty God reward you abundantly.

ACKNOWLEDGEMENT

I would like to extend my sincere thanks to my lecturers my Turyasingura Geoffrey, Mr Omiat Vincent, Mr Ekaru Samuel for equipping and imparting on me the knowledge that I used during the industrial training.

More thanks are extended to the entire management of Busitema university, faculty dean, dean of students ,academic registrar, university secretary and the bursars and others who are not mentioned here for the services that they render.

I would also like to extend much more thanks to the management caritas Moroto specifically project manager miss Natini Roseline, field coordinator Mr Ogwo Vinancio for them accepting me to do my I t with their organization, with the consultations through which they guided me.

Special thanks go to my friends especially Samuel, Samson, Sarah, clement for having been too cooperative to me.

ABSTRACT

The training was conducted in Caritas Moroto a nongovernmental organization that is founded and funded by Moroto Catholic Diocese charged with assessing the developmental plans of the people in that are within the districts of Moroto, Nakapiripirit, Napak and Amudat that comprise of Moroto diocese.

During the training I did activities such as mobilization and sensitization of farmers on cereal banking, training of village savings and loans associations (VSLAs) groups, training of the shepherds on basic live stock management practices and sensitization of communities on environmental degradation, refresher training of the community animal health workers on basic livestock management practices, training of the community environmental groups on natural resource management, demonstrating and participating in the planting of maize and groundnuts and monitoring the crop performance of model farmers among other activities.

During the course of the training, I was also able to learn some skills that include interacting with the communities based on the fact that we participated in some of the above activities hand in hand with the local people. I also gained a skill on how to handle quick cases that need quick responses, I also learnt skill like making energy saving stoves, cereal banking among others.

Although I was able to learn a lot from the training, I also faced some challenges during the training such as long distances to places for work, shortage of funds for mobilization and up keep for the farmers during the training, accommodation was also a challenge and also there was a challenge of language barrier to mention but few.

Despite the challenges mentioned above, I was able to complete my industrial training successfully.

I would therefore like to recommend that the following areas be observed by the organization in order to make the industrial training run smoothly; need to purchase more bikes for field activities, need to employ more field staff, farmers should be sensitized on agronomic practices and bad agricultural practices should be carefully considered and discouraged.

CHAPTER ONE

1.0 INTRODUCTION

Industrial training is one of the requirements of BUAC and other higher institutions of learning that allows the students to go for practical aspects in order to improve on their professional skills in the field before they graduate. BUAC places students to various organizations and non-governmental organizations in order to allow the students to apply the theoretical knowledge practically in the field, in order to acquire practical skills and knowledge. At the end of the training, the report is developed and presented to the university.

The field attachment was carried out in Nakapiripirit district attached to happy cow project under the support program of Caritas Moroto district.

1.1 ORGANIZATIONAL BACKGROUND

Caritas Moroto (social services and development) is the social development arm of Moroto diocese, charged with the task of assessing the needs of the people, designing and implementing developmental interventions with the aim of changing their lives. Caritas Moroto, since its inception in 1981 has been the foremost development organ of Moroto diocese mainly in the areas of social economic development, emergency response, justice and peace, gender issues particularly targeting the rural poor farmers, rural women and people living with HIV/AIDS as well as orphans and vulnerable children, the four districts of Napak, Nakapiripirit, Moroto and Amudat that comprise of Moroto diocese.

1.2 MISSION

To strengthen the capacity of the subsistence farmers and vulnerable groups for equitable and sustainable rural development guided by love, respect, transparency, integrity, accountability, and commitment.

1.3 VISION

To envision a peaceful, dignified, and self-reliant community in Moroto diocese.
