## **DEDICATION**

I dedicate this report to my lecturers of all modules, my parents: Mr Ngobi Keefa, my brothers and sisters who devoted all their efforts and time to support me financially and materially to meet my studies requirements to run smoothly and lastly my gratitude goes to the administrators of Busitema university Arapai Campus mostly the Agribusiness department for having equipped me with the necessary materials for the training and to all the staffs of Bugiri district production department for their devoted time given to me when necessary.

## **ACKNOWLEDGMENT**

My sincere thanks and honor go to the almighty God for enabling me complete my internship program plus the management of Busitema University which organized such a wonderful practical part of theory we study in class. And in the same mood I would like to recognize the efforts of Bugiri district production department especially my field supervisor Mr Omalla Zebron for updating and guiding me on where and what to do day and day out.

## ABSTRACT

Industrial training is one of the modules done at Busitema University Arapai Campus, aimed at equipping students with practical skills and exposing them to working conditions in field of their choice. The University sends its students to agricultural farms, factories like Kakira in Jinja and districts of their own choice where they do IT from. I carried out my IT from Bugiri district, Buwunga sub county from 28th February\_ 16th April 2022 . During my IT we based on crop production and management with my field supervisor, controlling several crop pests and diseases and advising farmers on how to prevent some of them. This training had a lot of positive results towards my career plans because of several technical knowledge that I acquired during my stay in the field and these include: collecting soil samples, controlling of fall army worms, control of Banana weevil borers, controlling of weeds in banana plantation. During IT I faced several hardships like heavy rains and sun shine, poor methods of farming, hunger , dusty roads, laziness of farmers to carry out the agronomic practices and many others. These cannot stop me from appreciating the the entire IT time frame. This report consists of four chapters. Chapter one describes the location and back ground of Buwunga sub county in Bugiri district, chapter two describes the activities that we carried out, chapter three explains the impacts of IT onto my future goals and perceptions and chapter four conclusions and my recommendations.

All in all my IT was a success because of the much technical knowledge that I got . However, there is a lot of disease and pest resistance in Bugiri district, Buwunga sub county as a result of the farmers mixing pesticides themselves using un recommended pesticides and instructions for a certain pests. Therefore I recommend the government of Uganda through crop extension workers to sensitize farmers to always use skilled labor to spray their crops in order to avoid pest resistance, the government also should deploy more crop officers at sub county levels to attend to all farmers to boost on crop industry in our country as far as crop production is concerned.

## **CHAPTER ONE: INTRODUCTION**

### **1.1 Introduction**

Industrial training is one of the study requirements carried out by every higher institution of learning like Universities and colleges for the qualifications of the award of certificates, diploma or degrees which is aimed at boosting on the students' practical skills and knowledge and also exposing the students to all working conditions in areas of study. BUAC sends her students to different agricultural related farms in different districts all over Uganda to carry out their I.T.

### **1.2 LOCATION OF BUWUNGA SUB COUNTY.**

Buwunga sub county is located in the Central part of Bugiri district, 10 km from Bugiri Town.

### **1.3 IT'S BACKGROUND**

The sub county is located in the Central part of Bugiri district and it is composed of nine parishes with a population of 15000 of people.

### **1.4 Mission of the Sub county**

To optimally utilize the available resources for service delivery so as to improve the quality of life of the population of Bugiri district.

### **1.5 The Vision of the sub county.**

A transformed society from a peasant modern and prosperous district with in 30 years.

### **1.6 OBJECTIVES OF BUWUNGA SUB COUNTY**

To stand as a model sub county for schools, institutions and universities where they conduct Agriculture as a course, tours and other training as well.

To increase on food production for the people in the community and out side the community.

To avail practical training to farmers in the locality.
