DEDICATION:

This entire work is dedicated to the almighty God and to all our family of Mr. Esuku John Robert and mum Ms. Abito Aidah Rose who have supported me not only academically but also in all aspects of finance to attain all the basic needs during the IT and at the university as well. I also dedicate it to entire fraternity of C&D especially the field supervisors who worked tirelessly to provide all the necessary knowledge and practical skills and lastly to all my friends both at schools, home and whom I worked tirelessly with in the farm to achieve the same qualifications and skills during the long course of IT

ACKNOWLEDGEMENT

A script of this nature can only be completed with external support and guidance. My humble appreciation goes to the **Almighty God** for the outstanding health given and giving me a chance to complete industrial training successfully. I also give my sincere thanks to the farm manager **Mr. Ojok Joseph** and his assistant **Mr. Aracha Jasper** for all their struggle to see that we finish our internship well, great thank also goes to my field supervisor **Mr. Amwak Erick** for mentoring me in a technical way and academic supervisor **Mr. Andrew Musoba** for the time he sacrificed to come and supervise me and not forgetting all the university lecturers who lectured me actively in class and in the farm during farm practice. Your friendship meant a lot to me and thanks for your patience, understanding and accepting my commitment to study.

May God bless you all,

Amen.

ABSTRACT

Internship started on Monday 28th, Feb, 2022 were we reported to the farm (Cooperation and Development Training Center) located in Alito - Kole and the farm is found in northern Uganda, the farm manager Mr Ojok Joseph and his assistant Mr Amuko oriented us about the farm where we were told more details about the farm and all we required to make us do our internship successfully. We were taken round the farm and shown the different sections in the farm like poultry, piggery, dairy and goats among others. Throughout all the weeks we were in the farm, we were rotated in different sections where we were able to treat animals, spray crops and animals, watering crops, staking tomatoes, feeding of poultry birds and others, I was able to participate in cleaning of the goats unit, watering of crops, treating the animals, I was also able to gain skills like how to make a nursery bed, how to incorporate soils, identify pests and diseases in crops etc. What I have done has made me gain many skills which include skills of treating animals and all the routine activities to be done when you have your farm. During the working period, I faced some challenges like lack of cooperation among we the students, confusion on the exact number of weeks for the internship, inadequate tools to use and also some communication gap between the students and trainees because of language problems. I was able to finish the internship successfully and as I conclude I humbly request the campus to come out with clear dates for internship in order to make us do our internship successfully and to the Farm of C&D,

CHAPTER ONE

1.1 INTRODUCTION

This report describes the activities implemented, skills and knowledge gained, challenges faced during the internship, conclusion of the report and recommendations derived from the challenges faced at Cooperation and Development training center in Alito - Kole, Uganda during the duration of industrial training.

1.2 Background of Cooperation and Development Training center (C&D)

The institute of C&D, briefly C&D is a non-profit making Italian Organization founded in Piacenza, Italy by the Late Father Vittori Pastori in 1982. In more than 40 years of activity in Karamoja region, C&D has built a strong and collaborative links with the local community and attaches to the delivery of much needed services and resources to the most vulnerable through participatory approaches.

C&D, in agreement with Lira Catholic Diocese is operating in Alito-Kole district of Lango sub region to implement in the livelihood project in northern Uganda. Alito training center was formerly a leprosy center (till 1985). The creation of a new center began in early 2017 and involves the establishment of the direct buildings to make classrooms, a kitchen, dormitories, workshop, pit latrines and also student's recreation halls etc.

In the past three years, C&D preferred with VSO to implement leveraging local economy through agriculture development (LEAD). Project was successful. The overall goal of the project was to improve economic opportunities in agriculture for young people/youth and women in northern Uganda.

C&D Alito training center is offering non formal skill training in agri business alongside life skills and business knowledge. Agro consultancy and farmers advisory services, community outreach support Programme, commercial production for IGA, platform for industrial training among others and over 2000 both direct and indirect beneficiary have successfully benefited in various projects.
