## **ABSTRACT**

This report contains and describes the activities implemented, skills and knowledge gained, challenges faced during the industrial training conclusion of the report and recommendations derived from the challenges faced from quality yolk farm. The objectives of the industrial training are to make students benefit from the skills and knowledge gained from the field s. and also to enable them apply the knowledge from classroom to practical activities.

During industrial training I was attached to a poultry farm. This was followed by an orientation where I was first introduced to various areas of the farm. Meanwhile in the farm I was able to pass through different activities which included vaccination, brooding, mixing feeds and feeding birds, water supply, feeds processing, eggs collection, raking and many others, nursery bed activity was also included.

Chapter three is consisting of the impact of the attachment which includes some of the skills and knowledge gained, influence of the training to me, responsibilities undertaken, challenges faced and correlation of the activities to classroom. In chapter four there is conclusion and recommendation of the report and the appendices.

## **CHAPTER ONE**

### **1.1 INTRODUCTION**

Industrial training is one of the learning system which is conducted to expose students to skills acquisition i.e. communication skills, administration operation of an organization / farm.

I was attached to a poultry farm since I had realized that poultry farming is one of the alarming project among other projects that are helping to improve standards of living of many citizens in Uganda both in rural and urban areas. This is because poultry is practiced by most of the people in Uganda .we can witness this from our village settings where we can find at least a chicken in a house hold.

### **1.2 BACK GROUND OF THE FARM**

Quality yolk farm is a poultry farm which has specialized in the production of table eggs. It was started in January 2019 with a total of 900 layer birds by Dr. Mawadri Patrick as the farm director.

### **1.3 LOCATION OF THE FARM**

Quality yolk farm is located 3kms from Soroti town in, Serere road/old Mbale road in eastern region. It is located in Amour village Ochokican sub county Soroti district.

### **1.4 GENERAL OBJECTIVE OF THE FARM**

The general objective of this farm is to produce table eggs so as to improve on the nutritional value of people in different communities and hence improving standard of living.

### **1.5 PROBLEMS FACED IN POULTRY PRODUCTION**

The average poultry production in Uganda today is mostly affected by diseases which include viral diseases like Newcastle, gomboro, fowl pox etc. and others are bacterial like coccidiosis, fowl pleura pneumonia etc.

This has greatly resulted to losses by most of the poultry farmers and hence drops in production
