DEDICATION

I dedicate this report to my beloved parents Mr. OLINGA DAVID and Mrs. NAMUKOSE BETTY as an appreciation for their tireless effort and support rendered to me both financially and mentally. I pray that may the almighty God bless the work of their hands.

Great sincerity goes to my beloved lecturers who guided me academically especially Madam NABULIME LOY and the entire well-wishers.

ACKNOWLEDGEMENT

I would like to extend my sincere appreciations to Bugaya sub county officials especially my field supervisor Mr. Mayanjja Emmanuel, Madam Kasuubo for the knowledge and skills rendered to me during the training and my parents who supported me financially and through guidance and counseling to see that my internship was completed. May the almighty GOD bless and reward them extra abundantly and above all the almighty God for the strength, knowledge, wisdom, good health and gift of life, which enabled me persevere throughout the industrial training exercise and report writing.

I am also grateful to the staff of Busitema university Arapai campus particularly the department of agribusiness and extension for their opportunity granted to me to carry out my internship in order to enable me acquire skills, knowledge and experience in course of study. I would like to extend my sincere appreciations to my beloved parent especially Mrs. Namukose Betty for the endless financial support and effort rendered to during my internship may the almighty GOD bless you abundantly.

ABSTRACT

This report was compiled from the activities carried out during industrial training at Bugaya Sub County in Buyende district from 28th February 2022 to 06th May 2022 for a period of 10 (ten) weeks. The internee was placed in production department under agricultural section of the local government institution.

Objectives of the industrial training was to enable students' interaction with different people in their respective professions of all levels like supervisors, employers and employees, to acquire knowledge in managing crops, animals and other agricultural related activities to acquire skills which are practical and to relate them to the theory studied from the lecture rooms and to get exposed to the outside world.

However, the internee was engaged in orientation, establishing of banana plantation, planting of maize and beans, rice agronomy, budding of oranges, coffee agronomy, poultry management and of planting of passion fruits.

Knowledge and skills gained during the fieldwork attachment included knowledge on how to manage coffee plantations, managing of banana plantation, planting of passion fruits, how rice is grown and self-confidence, analytical skills etc.

Challenges faced during the industrial training placement included high transport costs, high illiteracy rates among farmers, short period of the training and also high community expectations, unfriendly weather conditions like daily heavy rains especially for the last four weeks of my training.

Conclusively despite the above mentioned challenges the industrial training was so knowledgeable and skillful therefore I extend my thanks to the production department of Bugaya sub county and Busitema University.

CHAPTER ONE

1. DESCRIPTION OF THE ATTACHMENT

1. Introduction

This report describes the activities carried out, skills and knowledge gained, challenges faced during the internship, conclusion of the report and recommendations derived from the challenges faced at Bugaya sub county, Buyende District Local Government during the time of industrial training.

Objectives of the industrial training.

2. The objective of the internship to students is to;

Make students benefit from the skills from the fields

Make students implement classroom knowledge in the field.

Build confident in the students.

Make students be exposed to the developed technologies.

3. Background of Bugaya sub county

Location and area.

Bugaya Sub County is found in Budiope East constituency in Buyende district.

The Sub County is made up of four(4) parishes with a total of twenty (20) villages the largest of all these parishes is Gumpi village.

Relief and climate

Bugaya sub county experiences bimodal rainfall and first rains usually comes in March to June, second rains during September to November. With recent changes in the global climate, these seasons are bound to change cause long dry spell and unexpected showers of rain which was not the case before.

Bugaya subcounty experiences temperatures of ranges from 23°C to 29°C which is very suitable for both agriculture and human settlement.

Demography
