ABSTRACT.

This report contains and describes the activities implemented, skills and qualifications gained, challenges faced during the industrial training, conclusion of the report and recommendations. The objective of this industrial training was to make me benefit from the skills and knowledge gained from the fields and to apply the knowledge in the classroom and also build my confidence in handling animal related issues in future.

During the period of two months that is to say 28th Feb to 6th May 2022, I conducted my industrial training from Dokolo District Local Government, production department being supervised by the DVO as the field supervisor and the DPMO, Dokolo as the senior supervisor. DDLG is located on Soroti-Lira highway. It was open officially as a district in the year 2006. The production department of the district was established with the aim of improving the production and productivity of livestock e.g., bovines, caprines, porcines, ovines and poultry among others.

The department is headed by the D.P.O, D.V.O, D.A.O, Fisheries officer at the District and at the Sub- County we have the Agricultural officer, Fisheries officer and Assistant Animal husbandry officer. To achieve the above objectives and aim, I was involved in many activities in the field such as: Meat inspection, treatment of animals, routine management practices, training of farmers, livestock vaccination, monitoring of OWC inputs, and spraying of animals

The above activities were carried out successfully however among challenges like long distances, rigidity by farmers, poor mobilization, no financial support and lack of proper transport. I therefore recommend that proper mobilization of farmers must improve for the training programs to solve the problems of poor turn up during such activities, government should also increase the number of motorcycles to solve transport problems and more equipment and veterinary drugs to be provided so that animals are treated and vaccinated in time.

1.0 CHAPTER ONE.

1.1 Introduction.

This report describes the activities implemented, skills and knowledge gained, challenges faced, conclusion and the recommendations derived from the industrial training that was carried out from production department of Dokolo District Local Government during the period of ten weeks.

1.2 Objectives of the industrial training.

- To gain practical skills, knowledge and experience in animal husbandry.
- To make students apply classroom knowledge in the field.
- To build confidence in the students
- To increase on production and productivity of the animals and their products.

1.3 Background of Dokolo District.

1.3.1 Location.

Dokolo District Local Government is located in the Northern part of Uganda being bordered by Lira district to the North, Kaberaamaido to the East, Amolatar district to the South and Alebtong district to the North-East. It is located along Lira-Soroti high way, it contains (10) sub-counties four town councils.

1.3.2 Political and administrative infrastructure.

The district is under the political leadership of the Lc5 who heads the governing council and the Executives. The Council is the sole decision-making body for the district and its decisions are implemented by the Technical Planning Committee staff from various departments headed by the Chief Administrative Officer. There are 2 Sectorial committees of the district council each headed by a secretary (executive) namely; Production, Works and Technical Services Committee and Finance, Planning, Administration and Community Services Committee.

1.4 Beneficiaries of Dokolo District local Government.

All the farmers in the district are beneficiaries including those in the following categories;

- ✓ People with disabilities.
- ✓ People with HIV/AIDS.
- ✓ The elderly.
