ABSTRACT

This report contains and describes the activities carried out in details, skills attained, trainings from the field outreaches and challenges faced during my internship.

The main objective of my industrial training is to complement on the classroom knowledge to make it complete by carrying out those principles practically, build confidence in handling and dealing with farmers for extension of production services. During internship I was attached to the department of production, this was followed by orientation where I was introduced to my field supervisor, staff of abattoir and my fellow interneers and later implemented the activities such as vaccination of birds, meat inspection, cleaning and disinfecting animal houses, feeding of animals, spraying, treatment of animals of diseases like hypocalcemia, contagious bovine papilloma, ECF and others, deworming of goats and cattle. These activities made me to gain a lot of skills and knowledge like doing meat inspection, communication skills with farmers. However it shows some of the challenges I faced during my internship like financial challenges, correlation with harsh farmers and traders and fewer veterinarians. In conclusion all activities were implemented and industrial training was carried out successfully and was able to gain a lot from it with some recommendations that I put forward to assist the smooth running of I internship like close monitoring and assistance of the interneers with back up and adding on the number of veterinarians to handle the big number of farmers

Also conclusions and recommendations of the report that I derived from the challenges I faced in Iganga municipal council local government

4.1 INTRODUCTION

This internship is a training undertaken by the student doing certain course in order to relate their theories learnt in class into practice. This also introduces the background of the field attachment and its objectives, location and description of the place of the field attachment including its map, organizational structure of the organization attached to its Mission, Vision, goals, them and the activities carried out of performed by the organization attached to.

1.1 OBJECTIVES OF TRAINING

To apply the lecture room knowledge into practice.

To get exposure to the community problems and participate in solving them

To extend knowledge to the communities of operation

To know more on the ethical codes of conduct as working with the experienced staff is concerned

1.2 METHODOLOGY

I got the letter of application of a placement from the university and concerned department I submitted the letter to the Municipal Husbandry Officer Iganga Municipal council who gave me a time on when to pick the placement acceptance, which I picked and I was told on when to report and start my training. The copy of the placement was shared by the department of Agribusiness and extension for better allocation of a supervisor. On reporting reported I was oriented and this made comfortable because I got to know the dos and don'ts while at the training areas

Interview method: I was able to interact with farmers during my training ,I would ask them about the areas of interest this helped me to know more .

Recording methods. I was able to search and read some literature concerning some disease and diagnosis to add on the confidence before delivery of information to the farmer

Document reviewing: I had access to the documents /records that were kept by the Husbandry officer in his office
