## **ABSTRACT**

Industrial training is the work experience that is relevant to academic and professional development of a student prior to the graduation where students put into practice what has been theoretically learnt. Industrial training was aimed at exposing the students to actual working environment and enhance their knowledge and skill from what they have learned in the university, equip students with practical and hands-on skills needed in the world of work, enable students interface and get exposure to the dynamics of applying theoretical knowledge to real industrial routine operations, etc.

Industrial training was carried out alongside routine academic programmes or at the end of first academic year for a period 10 weeks which commenced on 28th April 2022 to 16<sup>th</sup> May 2022 always beginning at 7:00a.m to 4:00 pm from Monday to Friday of every week of study in which activities like, orientation, , castration, breed and variety identification, spraying animals, treatment of sick animals, equipment identification etc. was carried out during the attachment.

During the course of the attachment I gained several skills in production and management, ageing goats, disease investigation, animal treatment.
