DEDICATION

I dedicate this industrial training report to the Almighty God for the sufficient grace in preparation of this work.

My parents Okiror Barnabas and Asio Florence may the Almighty God keep blessing the work of their hands.

ACKNOWLEDGEMENT

I am humbled to acknowledge the following people whose contribution in various ways made this industrial training a success. First of all extend my sincere gratitude to the sub-county veterinary staff Soroti district for their support.

A special thanks goes to my field supervisor Mr. Elubu Luke for the endless support and guidance in developing an industrial training report. I also thank the DVO Soroti district; Dr. Achoroi David for the encouragement and guidance in developing report.

I sincerely appreciate all the lecturers of Busitema University Arapai campus.

Lots of thanks goes to my brothers, sisters, friends and parents who guided, encouraged and supported me spiritually, mentally during the training.

ABSTRACT

The report in summary provides an outlook of work that took place during internship in Soroti district local government Soroti city.

Chapter one is an introduction of the report which include the following: what IT is, preparatory arrangement, justification of the IT, objectives of the IT, methods used, location of Soroti district veterinary office, historical background of SDLG, soil, vegetation and climate of Soot district, economic context of Soroti district, settlement pattern in Soroti district, Ethnicity, administration, organizational structure and objectives of the veterinary sector.

Chapter two covers activities that were implemented during the internship period; were on livestock production, piggery production, disease investigation, vaccination of pets against rabies, prophylactic treatment of animals, training of farmers on livestock production and management, identification of animals (ear tagging), feeding of animals (pigs) FMD vaccination, castration of pigs and bulls, record keeping and documentation, climate change, adaptation, promotion of sharing and learning.

Chapter three expresses the impact of the attachment which include knowledge, skills and attitude gained at Industrial training, responsibility under taken during IT, influence of internship on my future career plans and correlation of the IT activities

Chapter four narrates the conclusion and recommendation.

CHAPTER ONE

INTRODUCTION

1.1. Industrial training

Industrial training is the exposure of students to relate their theoretical knowledge to practical experience.

1.1.1. Preparatory arrangement

The preparatory arrangement were basically based on briefing of heads of departments (HODS) of the campus (Arapai)

Industrial training placement letters given to students to search for the farm/area for items to do IT from where they are given acceptance letters for the university (campus) supervisor to locate them during supervision.

Orientation was done on arrival of the IT place by the field supervisor.

1.1.2. Justification of the Industrial Training

According to the activities that were carried but, they were successfully done because I acquired many skills in public health (meat inspection), animal handling vaccination practical skills, disease investigation and their control measures and many more all in partial fulfillment of Bachelor of animal production and management.

1.1.3 Objectives of the IT

- To test the ability to apply theoretical knowledge into partial
- To get acquainted to the problems that are likely to arise as we work in the field.
- To learn and improve the abilities in planning, organizing and managing while in the field.
