ABSTRACT

I conducted the internship program at Atlas livestock dairy farm, which is a private entity in Ngora district from 28th Feb to 06th May 2022. The FAAS of BUA designated this field attachment with an intention of building capacity of the students pursuing different programs in practical skills related to their areas of specialization in various fields of agriculture in comparison with theoretical knowledge acquired from class as well as serving as a partial requirement for the award of Diploma in Animal production and management. This report is made up of four chapters, where chapter one majorly discusses the introduction which gives ALDF information about the background, departments of attachment, location, organization structure, ownership, sector of operation, beneficiaries and objectives. Chapter two discusses about activities of two departments which I practically did, description of tasks & working days, familiarity. Chapter three consists of the impacts of attachment which are; Skills gained, responsibilities and influence of the attachment to the future, correlation of performed activities & class room knowledge, challenges faced; chapter four which concludes and gives recommendations to both university and ALDF respectively for betterment of attachment, appendices and lastly reference.

CHAPTER ONE

INTRODUCTION

1.0 Introduction

This chapter discusses and explains the background of The Farm, Location of The Area, Organization Structure, Vision, Mission Structure, Mandates, Achievements and Justification of the Fieldwork placement.

1.1 Background of the host organization

Atlas Dairy Livestock Farm, ADLF started on 28th August 2008 with four Friesian cows by Mr. Okello Charles. In 2012, the cows multiplied in number to make eight.

The number of animals increased rapidly even the young once started producing up to date where the farm has about 173 heads of cattle producing the milk to the farm and the litters of milk varies from different breeds of cattle giving amount of litters like Friesians cows 75% gives 10-15 litters, Guernsey's give 15 litters and above and the Sahiwal gives some litters but not much.

In April 2020, 10 Camels were introduced to the farm which produced and are now totaling to 15 camels.

Also the farm has goats and the sheep where the goats are 156 and the sheep are 36 in number. However, the farm also has Geese which was introduced in 2021 and up to now they are 10 birds.

1.2 Location

Atlas Dairy Livestock Farm, ADLF is located in Eastern region, Ngora district, Kobwin sub-county. It is approximately 6km from the Sub-County Headquarters and it has been surrounded by other parishes like Kobwin parish, Akarukei parish and Achiisa parish.
