**A REPORT ABOUT INDUSTRIAL TRAINING CARRIED OUT AT TESO COLLEGE
ALOET (TCA)**

P.O BOX: PRIVATE BAG SOROTI -UGANDA.

COMPILED BY:

NAME: ERETU JOSHUA

REG NO: BU/UP/2020/0940

STUDENT'S NUMBER: 2000400940

PROGRAMME OF STUDY: DIPLOMA IN ANIMAL PRODUCTION

YEAR OF STUDY: 1

COURSE CODE:1301

EMAIL ADDRESS:eretuj@gmail.com

ap

**SUBMITTED TO THE DEPARTMENT OF AGRI- BUSINESS AND EXTENSION OF
BUSITEMA UNIVERSITY IN PARTIAL FULFILMENT OF THE REQUIREMENTS
FOR THE WARD OF DIPLOMA IN ANIMAL PRODUCTION AND MANAGEMENT
OF BUSITEMA UNIVERSITY.**

DATE OF SUBMISSION 26TH APRIL, 2022

DECLARATION

I Eretu Joshua do declare that this report has been prepared through my own efforts with original information. I confess that this record is original and has never been submitted to any institution of higher education for the same academic award.

Signature J. Eretu.....

Date 18/5/2022.....

BUSITEMA UNIVERSITY LIBRARY
CLASS NO.
ACCESS NO.

APPROVAL:

This is to verify that ERETU JOSHUA had a ten week period industrial training at Teso College Aloet farm.

Immediate supervisor Teso College Aloet.

Name: *E. Kawa, Kamea*

DEDICATION

I Extend my great thanks to our heavenly father for having helped me to finish my I.Twell and also extend my gratitude to my beloved **Family of Mr OPALAKIRO in general** for both financial and material support and all my friends by saying to them that kudoz

ACKNOWLEDGEMENT

I Thank the Almighty father for having given me the knowledge and grace for having carried out my I.T successfully.

My sincere appreciation also goes to my sister SANDRA, AYAMO, my caring mum and dad and friends for their love, financial and moral support given in my studies. I also send my great thanks to the manager, staff members of Teso College Aloet who worked very hard in both theory and practical work so that I come up with this delightful report and guidance/skills given to me during this training.

ACRONYMS

BBBRH -back, belly, brisket, Rear and head.

Dap. Diploma in animal production

E-mail -electronic mail.

ECF – East coast fever.

Reg no:- registration number.

Buac – Busitemauniversity Arapai campus.

E.g. – examples.

I.e. – that is to say.

TCA – Teso College Aloit.

OTC. Oxytetracycline

I.T-industrial training

ABSTRACT

Internship is a practical module carried out by all students in Busitema University during their recess term and it makes students acquire more practical knowledge and skills in Life. Students were placed in different places of their choice, me I went TCA which isa government secondary college with a farm. This has got the major projects which include dairy, crop enterprise and poultry production and management small ruminanand piggary management and others. Lectures, brainstorming and practical sessions were the major methods employed during the training to farmtrain the students. Practical session were out under the supervision of farm manager .This system of learning used helped meto obtainl skills such as disease diagnosis and treatment of livestock diseases, castration, pineapple and banana production and management, tick identification and control, meat inspection etc, As I appreciate magnitude of the achievement, I also faced a few challenges such as the limited access to equipment like tools use in routine management, hot wea, and the farm was not too big to accommodate the overwhelming number of internship students and unavailability of modern farm structures. However, I successfully concluded my internship and I do recommend TCA to increase widen the farm by bringing more enterprises, stock more drugs and construct modern farm structures for the future internship student

1.0 CHAPTER ONE

1.1 Introduction

Industrial training is one of the modules that aims at boosting students with practical skills and knowledge in their respective area of study, it's done by almost every higher institution of learning.

1.2 Chronology of TCA farm and its background.

The school was started in 1971 by Stephen Akabwayi. The farm started with only two enterprises i.e. dairy and crop enterprises, the dairy enterprise had two bulls and five cows while the crop enterprise had one acre of vegetables.

The students provided manual labor and there was also hired labor provided by the local draft power.

However, since the insurgency which occurred in 1987 up to 1992, which involved raiding from the karamajongs, this led to loss of livestock and destruction of crops.

In the year 1993, the school had to reestablish its farm with restocking 16 heads of cattle which were introduced by the Teso restocking project and funds from parents' contribution.

In the same year, piggery and poultry units were introduced with 200 layers for poultry and the funds were donated by world food program. Around 1996, the school got another grant from WFP and was used to start up eucalyptus, these funds were also used to construct a calf barn and a store for farm equipment, the tractor was also bought to speed up farm operations.

Originally, the school had 400 hectares of land but in 1996, half of this land (200 hectares) were given out to construct Soroti University.
