Name ..KHARIZMA ROSCO.....

DEDICATION

I dedicate this report to all my family members especially my grandmother Agwedo Glades for her kind heart supporting me since I was a child up to where I am right now may God bless you abundantly.

I would like also to dedicate this report to my uncles Mr. Okurut Nathan, Mr. Omongot James and my aunts Mrs. Ajilong Betty, Mrs. Amuron Eseza for being such promising parents to me

And also to my friends Gogo Khemis, Opolot Ben and Akareut Claudia not forgetting Ojangole Denis

AKNOWLEDGEMENT

I would like to recognize the presence of God Almighty for keeping me alive and enabling me undertake my studies successfully

Special thanks goes to the management of JEKA poultry farm for allowing me conduct my internship and the necessary support and guidance they rendered to me through the period of training most especially Mr. Basangwa Johnson, Mr. Bosco kajainaza

Also to all lectures whose instructions made me grasp the knowledge as background to my academic struggle.

ABSTRACT

The industrial training was done at JEKA poultry farm from the period of 21st may upto 27th of July 2018. The farm mostly deals in production of poultry and poultry products like; eggs, poultry feeds, litter and also one day old chicks, the farm also has set aside horticultural productions.

During the training, I learnt a lot of skills and gained experience in poultry production like vaccination of birds, raising of one day old chicks, disease diagnosis for poultry, also mixing of feeds for poultry like layers mash, growers mash, and chicks mash. In crop section, raising of the nursery bed for tomatoes, pest and disease control using the pest sides.

The learning process involved students discussing with the supervisors, instructors and also observing in order to gather information.

In conclusion I made some of the observation that I think the farm manager should fix on them so as maximize the profit earnings of the farm, among include; considering fertilizing the land so as to increase on the yields of crop production

However, there were a number of challenges that were experienced but all in all we managed to overcome them and get the necessary skill that is required of me.

1.0 CHAPTER ONE

1.1 INTRODUCTION

This training was conducted at Jeka poultry farm between 21st may to 27th July 2018 under the supervision of the instructor Mr. Kaijaniso Bosco. It was based on both animals and crop production and management practices which were conducted successfully.

1.2 HISTORY OF JEKA FARM.

Jeka farm of poultry started in 2007 with 500 birds that was housed in front of the owners' house situated on 50 x 100 feet plot in kamuli town council.

Because of the inadequate space for expansion, in 2009 farm land was procured in Bukwenge zone – Kamuli Municipality which is in the current location of the farm. On 21st august 2010. Jeka poultry farm was honored to host H.E Yoweri Kaguta Museveni, the, the president of republic of Uganda.

Since its establishment in 2007, the farm has continued to grow currently having a total of over 25,000 layer birds, in 2011 the farm started piggery section with five gilt out of which one was slaughtered since the pigs have multiplied total of 300 pigs, the steady growth of farm has led to a number of permanent employers from 1-20 on average of 30 casual laborers .

On a monthly basis the farm has introduced a horticulture department which is still intense stage.

1.3 LOCATION OF JEKA FARM.

The farm is located 4kms from kamuli town and 2km off Kamuli Jinja road behind Kamuli Girls boarding primary school.
