DEDICATION

With great respect and pleasure I would like to dedicate this report to my field supervisor DR OKENY S. ROBERT who welcomed me and accepted me to conduct my training in the department of production and marketing .the same pleasure goes to MR. TYAN JOHN who was ever close to me all the time via encouraging me and taking me for field work .not forgetting MR. OLARA BONNYFACE OJARA for his word of encouragement and practical skills he gave me. With due respect not forgetting my beloved mother ACAN MARGARET, at the time. I humbly dedicate this report to her for being so hard working and for the wonderful support she is giving me as far as my academic life is concerned. The same gratitude goes to my relatives uncles and aunties my pleasure goes to them for their kindness and love they had shown to me and their advice. My friends at school and around me ATIZIO MOUREEN AND AUMA EDNA SHARON. My supervisor MR. OLUPOT JULIUS and not forgetting all the lecturers at the campus for their lovely advice given to me time and again.

①

Above all I humbly give thanks to the almighty GOD most worthy one for the gift of life and protection during my training.

ACKNOWLEDGEMENT

I am highly delighted with great honor to display my sincere appreciation and gratitude to the administrators of Busitema University Arapai campus for admitting and enabling me study in the university

In the same way, I would like to convey great appreciation to all the lecturers at the university in their different capacities for their professional guidance given to me during my studies.

To the staff of Pader district local government my great honor and appreciation goes to them for the word of encouragement given to me during my training. 

APPROVAL

This report has been written and compiled by AKELLO WINNIFRED under the guidance of field supervisor in accordance to University guide lines and is ready for submission.

EXECUTIVE SUMMERY

1. The district council's mandate as a planning authority is provided for under section 36 (1) of the local government Act of 1995 as amended in 2001. The district council is the highest planning authority in its areas of jurisdiction and formulates policies upon which the planning process hinges. The technical organ of the planning authority is the district planning committee. At Sub County, there is a similar legal provision for the sub county council as the planning authority and sub county Technical committee as technical team. At parish level, parish development committee is the planning organ that gives support to LC-2 Councils. The LC -1 participates in the village planning process as the bottom stakeholders in the planning hierarchy throughout the district.
2. In the preparation for this 5-years development plan (2015/16-2019/2020) a bottom approach was adopted as provided for the participatory planning guidelines to ensure that communities own decisions that affect their destiny. In addition the overall planning framework has been guided by the NDPII which set out government national objectives and strategies for reducing poverty and realizing middle -income status by 2020. The medium term expenditure framework, national budget framework paper and district budget conferences provided for stakeholders to identify key issues for inclusion as priority areas in the plan. The plan is formulated to address critical development concern and challenges that arose out of LRA war in the district and facilitated recovery process.
3. The issues raised in this plan are therefore wishes of the people and other stakeholders in Pader district in respect of how their development concern should be handled for poverty eradication and prosperous communities.
4. The objectives of the plan is to provide a framework through which all departments and development partners conduct business towards the attainment of sector objectives and overall district 's Goal which is "communities attain middle income status by 2014"
5. It has been developed while incorporating the sector development plans, the LLG Priorities and development partners/humanitarian activities in the district.

6. The plan contains a district visions and missions. the district vision is “A prosperous and self –Sustaining Local Economy by 2040” the missions is to “Co-ordinate the delivery of the services with focus on national and local priorities for wealth creation , promotion of sustainable peace, recovery and socio-economic development of the district “
7. The plan also present among other analysis of each sector with respect to performance in last 5 financial years (2010/11 to 2014/15). Potential, opportunities, constraints and challenge of each sector are equally presented. Priorities and revenue allocation in the next 5 years as well as quarterly allocation of resources over the next 5 financial years. The modalities for dissemination of information in the plan are equally presented.
8. A lot of emphasis has been put on mainstreaming cross cutting issues such as climate, Gender, Environment, HIV/AID. Disasters preparedness, other population and development factors , orphan and vulnerable children , Human rights, tread, food security, physical planning in all sect oral development programs in the district.
9. The district performances in the last 5 years that is, the first DDP 2010/2011 to 2014/15 stand s at an average of 76% of planed targets against achievements. This is higher than the previous development plan indicating an improvement in the performance of service delivery to the people by 8%, a trend that show s progressive achievements.
10. Out of all the grants that were plan and approved in the last DDP(2010/11 TO 2014/15),Development grand from the central government were successfully receipted and implemented although there were significant cuts in the financial year 2012/13 following challenges in the OPM . This led to roll out of several projects in the subsequent financial years, a factor that slowed tremendously the intended achievements.

11. During the last budget conference, a lot of emphasis was placed on education, infrastructure to facilitate the processes that unlock the poor performance of in the primary leaving examinations causing the low literacy in the district. Other sectors of health, livelihoods and roads will also become areas of major focus in the next five years.
12. A number of critical challenges still need to be addressed to improve performance in the district. Some of these challenges include but not limited to; low revenue base, inadequate staff in some critical positions, weather effects, pest and diseases, cases of shoddy work by contractors, late release from central government, traumatic effect of nodding diseases among others.
13. Despite those challenges, the district has a number potential that can be tap for rapid development. Some of these include available electric power, fertile land labour, communication networks, and committed leadership among others.
14. In the coming five years, the district plans to invest 118.8 billion Uganda shillings as indicated in the projections in chapter 3 of this plan, in a number of development and recurrent activities, this will be supplemented by averagely 83 billion Uganda shilling from development and humanitarian partners. The priority areas of expenditures are summarized in the subsequent sections. The financial strategy will include; Government of Uganda's funds, locally raised revenue and donor contribution which will be off budget or directly implemented by Agencies.
15. Health sectors; the District intended to retain the health workers by providing staff houses through DDEG and PHC Development components and making health facilities functional. Other health care interventions/packages emergencies such as nodding disease will equally be prioritized with support from other.

ABSTRACT

This industrial training was carried out at Pader district local government in the department of production and marketing from 20TH, May to 26TH. July, 2019 as a requirement for the award of Diploma in animal production and management in Busitema University, Arapai Campus. The report contains the introduction of which it gives clearly the background of the district, mission and vision statement, core values and mandates of Pader district. The report also explain the various activities carried out at Pader district during training such as preventive management like castration ,praying and de-worming .Treatment against anaplasmosis and east coast fever ,inspection of poultry meat, training farmers on fish feeding ,measurement of fish pond and construction ,distribution of heifer to the beneficiaries ,vaccination of pets animals, receiving of fish feeds, monitoring of aquaculture farmers in Pader district, vaccination of poultry birds against Gomboro and Newcastle and vaccination of animal against black quarter and treatment against trypanosomiasis.It also contain challenges faced during the training like failing of other famer to respond during vaccination time made the work more complicated.Harse weather condition i.e. heavy rainfall hinder the movement of field workers.

It also reflect some impact of the field attachment such as practical skills which were attained in areas like pet vaccination,poultry vaccination ,vaccination against blackquater,and treatment of different livestock diseases like anaplasmosis.It also contain conclusion ,work plan and recommendation.

4

CHAPTER ONE

Introduction

Pader District was divided from Kitgum district and was signed to be district on the 14th December 2000. Pader originally consisted of two counties i.e. Agago and Aruu Counties. Later Agago County was carved from Pader district to form what is now Agago District.

Pader district now consisting of only one county i.e. Aruu, after the division of Agago has been divided into two constituencies- Aruu North and Aruu. The district is bordered by seven districts namely Gulu and Omoro districts from the west, Kitgum district from North, Agago district from the East, Oyam district from the Southwest and Lira and Otuke districts from the South.

Pader district has 15 sub counties and two Town Councils and consists of 55 parishes. These sub counties are Atanga, Laguti, Acholibur, Tenam, Pukor, Porogali, Paiula, Pader, Pajule, Lapul, Ogom, Latanya, Awere, Puranga, and Angagura. The two Town Councils are Pader and Pajule Town Councils.

95% of the population in Pader district is made up of subsistence farmers. The average of land cultivated per household is 2-3 hectares in a year. Labour for the cultivation is provided by the members in the community on rotational basis.

LIVESTOCK SITUATION ANALYSIS

The agro economic zone in Pader district is suitable for rearing various types of animals particularly cattle, small ruminants, poultry and for aquaculture.

Since the end of insecurity in this region, the livestock population has been on a steady increase due to various restocking efforts rendered by the government of Uganda and Non-governmental organizations as well as by individuals.

Animals in Pader are kept at house hold level (using traditional management practices) with each family keeping just a few number of animals.

Although improved technology has been advocated for, limited sustained adaptation has been registered.
