DEDICATION

I dedicate this report to my parents (Okello James and Agabo Janet all of Moru Village Willa Parish Willa Sub County for they have always stood with me in times of difficulties especially, they supported me both financially, morally and by the grace of their prayers to me I have been in position to comprehensively compile this report . The others recommended in these report are; our family members, Okello Elijah, Odeng Tanas, Apio Mary Lakeri and Asengo Mary.

ACKNOWLEDGEMENT.

This goes to my immediate supervisor Mr. Eaku Denis Opio for having adhered with me throughout the course of my internship amidst many challenges, I do appreciate him so much and only God can reward him. On the same I appreciate the support given to me by the NGO called PAG/Compassion Willa Child Development Centre (CDC) for the full support they rendered to me especially for their computer services that helped me on typing the report and also their WIFI used for internet searching

I also extend my thanks to the entire staff of Willa Sub County and Amuria District Local Government for accepting me to do my intern with their organization and for all their help received.

Another thanks goes to our University Supervisor Eastern Region Mr. Eskau John Peter for his entire efforts towards the success of my internship.

ABSTRACT

This report was generated from various activities carried out at Willa Sub County with the main objective of giving hands on experience to students on different fields of agriculture. The major areas being handled during the practice were, the farmer field trainings conducted in the farms of demo farmers and at the Sub County Headquarters. Two groups of Perennial Crops (citrus mangoes) were visited and minimal trainings were given at the site, there was also an attachment made with the Women's SACCO, these handled the areas of budgeting and group dynamics. main objectives are to enable students carry out practical activities and projects in the field, develop interest in Agricultural Profession and better appreciate the intervention, acquaint students of the basic practices done in the crop and farm groups, the methods of knowledge and skills dissemination used during the farm visit included lectures, demonstration and brain storming. Some of the activities performed are; pest and disease identification, control and management in crops, weeding operation, management and identification of important varieties of citrus and mangoes. Other attachments made were demo garden visits at the bee keeping farm, fish demo site and nursery demonstration site, involvement in the full council sessions. These learning visits helped me to acquire skills and knowledge such as; pest and disease identification and management, farm lay out for beekeeping and various forward and back ward leakages that can be emerged with bee keeping i.e. poultry farming for share of chicken droppings as feeds for fish, forestry that supplies the bee with nectar. Basically the activities carried out gives comprehensive understanding of what has been covered in class. However, some challenges were encountered during the practice which includes; poor time management by technical staff and poor turn up by the farmers in some sections, limited facilitations in sections like field trip, transport and SDA facilitations. Despite the challenges a rising as stipulated above, I am happy that the training ended successfully.

CHAPTER ONE

INTRODUCTIONS;

This study was carried out under the Local Government of Willa Sub County, Amuria District under the Department of Crop Production and Marketing.

The Sub County is located in the north Eastern part of Amuria Town Council about seven kilometers from Amuria Town it is denoted with its natural endowments of two hills called Willa and Akisim hills

Willa Sub County was curved from Kuju Sub County in the year 2011/2012 and made operational in the year 2013. It is composed of five Parishes and 35 villages with a total population of 13000 by the census of 2012

The various sectors active are; Production, Health, Community Policing /Development, Environmental Conservation and Administration, all these sectors get their funding's from the Local Revenue and Central Government remittances which is conditional and unconditional grants. Agricultural sector lies under the Production Department and it's the one which receives the biggest funding.

The major economic activities in these Sub County include; farming, stone quarry, brick making and charcoal burning. The type of the soils are moderately fertile and the area receives moderate rainfall just like other parts of Teso. The main cash crops grown are; red pepper, food crops are; cassava, groundnuts, millet, sweat potatoes, etc. the crops are both annual and perennial.

The Sub County leadership is composed of the following;

The Technical Team is being headed by the SAS, The Political arm is headed by the chairperson LC 111.
