ACCESS NO. FAA 1589

DEDICATION:

I would like to thank my parents; *Mr. chemutai stephen* and *Mrs. yapchebet jesca* for their enthusiastic and material support they have rendered towards my education and production of this report.

~~I would also like to appreciate my lecturers for their academic ideas that natured our~~
time on field. I would also like to thank my field supervisors for their tireless skill promotion and education during the course of interaction; *Dr. Yatwa Jude (D.V.O)*, *Mr. Cholole Enock (Assistant veterinary)* among others.

Not forgetting my friends who gave time and material support for the production of this report and they include; *chesebesilas*, *Cherop priscila*,

ACKNOWLEDGEMENT:

I would like to appreciate my academic supervisors especially for having allowed we the students to undertake industrial training at the scheduled period of time. It has enabled us to exercise our class work practically. I would also thank the academic supervisors for their patience and kindness during supervision time.

I would like to thank my field supervisors for their hospitality and kindness during our course of interaction. I would like to thank the field supervisors for their acceptance to correct me and educate where necessary because they really encouraged skill and knowledge acquisition.

Finally, I would like to thank my course-mates and any other friend of mine who has participated towards the production of this report

“God bless you all”

ABSTRACT:

I carried my attachment at kween district local government in the production department.

kween is one of the districts in Uganda in the eastern region which borders bukwo district in the east and kapchorwa district in the west. It is a form of decentralization of administration in the country.

kween district local government comprises of many departments which include;

production, administration, finance, planning, health, works among others. During the course of my industrial training, I was attached to the district production department which comprises of crop production and management, animal production and management and veterinary department., I was attached to the district veterinary office and which is a department majorly concerned with animal health within the district.

While in the veterinary department, I was attached to binyiny sub-county to carry out data collection and subsequent vaccination of poultry against New Castle Disease (NCD), subsequent vaccination of foot and mouth disease (FMD) and treatment of various diseases such as east coast fever (ECF), mastitis, heard water, prolapse, training of farmers on pasture growing and management, inspection of meat, vaccination of dogs against Rabies, In data collection, techniques like random sampling, extraction from published data were employed so as to aid required like number of poultry per household and their health, number of cattle per household and their health.

Vaccination was thus carried out after data collection and analysis within the veterinary staff

During the course of data collection and vaccination activity, I acquired skills which include;

-
- (i) Understanding drugs of choice like New castle vaccine B1 (the drug contains penicillin and streptomycin which are bacteriostatic) against new castle disease

CHAPTER ONE:

INTRODUCTION:

I undertook my attachment at kween local government. Kween district local government is a government entity.

binyiny sub-county is located in kween district and is bordered by binyiny town council in the East, kitawoi sub-county in the south, kaptoyoy Sub-county in the west and ngenge sub-county in the North. It is among the Eighteen (18) sub-counties in Kween district.
