**DEDICATION:**

This entire work is dedicated to the almighty God and to all our family of Mr. EKYA BOSCO and SCOVIA EKYA who have supported me not only academically but also in all aspects of finance to attain all the basic needs during the IT and at the university as well. I also dedicate it to entire fraternity of LFI farm especially the field supervisors which has work tirelessly to provide all the necessary knowledge and practices skills and lastly to all my friends both at schools, home and whom I worked tirelessly within the farm to achieve the same qualifications and skills during the long course of IT

---

## **ACKNOWLEDGEMENT**

The great appreciation goes to the almighty God for the outstanding health given and giving me a chance to complete industrial training successfully. A great thank goes to my field supervisor Mr. FRED OCILO for mentoring me in a technical way and academic supervisor Mr. ANDREW MUSOBA for the great supervision given to me and not forgetting all the university lecturers who lectured me actively in class and in the farm during farm practice. I also acknowledge all my friends from the University, farm workers and non formal students whom we were able to work hand in hand with them to attain the same goals, aims and objectives of the mighty farm.

Table 5: shows a vaccination program for broilers .....	23
Table 6: shows composition for sows, gilts and boars.....	24
Table 7: shows formulation of 160kg feed for weaners.....	24
Table 8: shows dosage of the dewormer used in piggery.....	25

## **ABSTRACT**

This report contains and describe the activities implemented, skills and qualifications gained, challenges faced during industrial training, conclusions and recommendations derived from the challenges faced at Light Force International. The main objectives are to sustain livelihood and thus **LFI** opened up an Agricultural school to equip the youth of the rural area to be effective in farming. During industrial Training I was attached to various sections such as Poultry, Cattle and goats, Piggery and Horticulture. While at the various units, I gained skills and knowledge such as hand milking, preparation of a nursery bed and management of seedlings, how to operate various machines such as a milling machine and a threshing machine as well as general management of livestock. During Internship I faced challenges such as difficulties in operating some machines in the farm, poor transport due to bad roads in Omito Village and long distance to the piggery units which was far from the main farm. In conclusion all the activities were implemented and industrial training was successfully carried out. I was able to attain a lot of skills but face challenges which made me to recommend that in order for **IT** to run smoothly, the University should establish a good relationship with some of the organization to which students are attached such as **LFI**, the government should improve on infrastructures such as roads to ease movement of products to the market, rural electrification for adequate power supply in the farm to ease operation of the machines in the farm.

---

## CHAPTER ONE

### 1.1 Introduction.

- This report describes the activities implemented, skills and knowledge gained, challenges faced during the internship, conclusion of the report and recommendations derived from the challenges faced at Light Force International Farm, Uganda in Lira City during the duration of industrial training.

### 1.2. Background of Light Force International(LFI)

---

Light Force International– Lira is a Christian base organization founded by Preacher of word (missionary) Sir George Ronald Ridnil which was founded in 2003 under Light agency in UK. LFI has worked in Lira, northern Uganda since January 2004 initially working in the displaced peoples camps at the height of the rebel insurgency which devastated people's lives. After a holding peace was in place, those displaced moved back to their land.

LFI supported the return process and worked with communities with special emphasis on the education and health sector. LFI has enjoyed partnership with World Food Programme (WFP), UNICEF and Memisa Belgium

Since 2007 LFI has purchased land and developed projects in Telela, Omito Parish Lira. Whereby over 50 local people have been employed to support the running of the project which included Agricultural and vocational schools, Nursery and Primary schools, Children's village, Visitor's center and Community Health Center. We Farm 140 hectares with a mixture of crop and livestock.
