APPROVIAL

I attended all the tasks that were supposed to be carried out by me as an internee at the farm and approval was made by the supervisors as below.

Field supervisor

Name..... KHISA A. MUKONYI

Signature..... 

Date..... 04/05/2022

Academic supervisor

Name..... Michael MASANZA

Signature..... 

Date..... 17/05/2022

ACKNOWLEDGEMENT

First and foremost. I would like to thank the almighty God for his protection, divine health, his love upon me, his knowledge and provision that he offered unto me, my gratitude also goes to kasajja stock farm for giving me great opportunity to carry out industrial training. Great thanks to my field manager Dr kissa Anthony and Mr. Ogwang Alex for the practical skills that they offered to me academically and for their mentor, my life changed to a greater extend and my attitude, future career is motivated .may God bless them.

ABSTRACT

Industrial training is the training conducted by all students in Busitema university arapai campus which include DAP, CGA, DCP, BSA and APM.

I conducted my industrial training in kasajja stock farm which is located at Kolonyi zone Nakaloke town council in Mable district

The internship started on 28th/02/2022 and ended on 06th/05/2022 at kasajja stock farm

During the training it began with orientation of the students in and around the organization and working environment which include managers, farm land, farmers and introduction of the staff

The technical personnel of kisajja stock farm practically guided me to better understanding of my classroom work with regard to my course .These tasks include the following,

Dipping cattle with acaricide called cypermathrine in concentration of 6400 liters of water to 12800ml of acaricide, dehorning and debuding of calf horns, deworming with albendazole orally

Routine and daily management practices like milking, cleaning calf pen and feed calf by bucket feeding, feeding animals in zero grazing and cleaning milking pallor.

Fish pond management practices and fish sampling, community outreach and crop management practices .However during the training I faced some challenges like stress due to new environment, high cost of living, long distances and weather challenges

In conclusion, despite of the challenges, the industrial training was successfully accomplished and I was motivated, my future career and attitude towards agriculture have improved to a greater extend due to practical skills (hands on) that were acquired

I do recommend that dipping of animals should be regularly done within two weeks interval because of tick born diseases that causes diseases of veterinary importance.

In addition the farm should at least establish pasture legumes and supplement animals with diary meal in order to increase milk yields per annum.

CHAPTER ONE:

1.0 INTRODUCTION

The industrial training was carried out at Kasajja stock farm from 28TH Feb. 2022 to 24th April. 2022 where by the number of activities were carried out at the farm and which includes the following orientation, making work plan, cleaning milking parlor, dipping animals, pasture establishment, parasite control, fodder harvesting and feeding animals, calf management, castration, dehorning, fishing sampling, goat management, drug identification, pasture identification, hay making and apiculture. Internship is a course unit run by the universities for most of the programs. This is intended to equip students with field skills.

1.1 Location of the farm

Kasajja stock farm is located in Nakaloke sub county, Kolonyi zone 1 in Mbale district. It is 8km north of Mbale town boarding 2 districts of Butebo in western direction and Bukedea in north direction.

1.2 Mission of the farm

To produce high quality milk

1.3 VISION OF THE FARM

A world in which people are empowered to succeed in the global economy

1.4 OBJECTIVES OF THE FARM

- To produce high quality milk for home consumption and commercial purposes.
- To create employment to local people around.
- To become a model farm in Uganda.

1.5 BACKGROUND

Kasajja stock farm was established early 1970 with poultry farming and local zebu animals occupying 50 acres of land.

Then in 1982 five (5) exotic breeds of animals (freshens) and one (1) bull was introduced from Kenya. Now the farm has 149 cattle.
