1. Abstract

Internship is a course module that gives students a chance to use classroom knowledge in the field and gain hand on experience in the entire job market. It is carried out by university under the supervision in the respective place of attachment. I carried out my industrial training from Kadama town council under the production department for a period of ten weeks. During industrial training, I was attached to the production department under the supervision of Mr. Bonyono Thomas. Under his supervision I conducted various activities in correlation of my career for example management of coffee fields through stumping, fertilizer application, teaching farmers on enterprise selection, potting, harvesting of shoot stocks, soil sieving, watering, offering extension services to farmers and among others. I gained my skills during industrial training such as interpersonal skills, communication skills of managing coffee fields, cleaning and sorting of potted plants, grafting of mangoes, cutting of polythene bags for potting, covering of tunnels and among others. The industrial training was done successfully apart from a few challenges among which were shortage of funds to finance some activities, shortage of food, language barrier, as well as weather climate that did not allow us to reach some places as planned. However these challenges were addressed by the Kibuku district local government through my field supervisor and myself by reducing my budget to minimize unnecessary expenditure. Allocating more time to compensate for the lost hours due to unfavorable weather changes, provision of language interpreter to solve language barrier problem. All this were made a success due to the effective cooperation between me, field supervisor and other staff members of kadama town council

6. CHAPTER ONE

1. INTRODUCTION

Location of Kadama town council

The town lies along 107kilometer Iganga-Triniyi road approximately 40kilometer south west of Mbale

History of Kadama Sub County

Kadama Sub County is a sub County in eastern Uganda. It is in Kibuku district which district was named after its chief town, Kibuku where the district headquarters are located.
