ABSTRACT

The Industrial training was carried out of at Anaka Sub-County in Nwoya District Local government between 28thFeb to 06th May 2022, where I managed to undergo a tall schedule of different activities throughout the whole month.

The objective of the IT attachment was to get exposed to practical orientation on concept learnt in class relate with a read field work, make recommendation on how farmers can adapt with the modern methods of farming within the Anaka Sub-County in Nwoya District Local government

During the training I participated in activities like castration, germination test, treatment of pigs, transplanting of cabbages seedlings demonstration of potting and many others as shown in chapter two.

I used equipment like hand hoes, pangas, watering can and many other materials

I gained skills and knowledge in the above activities carried out during the IT but, however faced challenges like bad weather condition, long distance from area of resident to place of IT and many others

I therefore recommend that there should be enough funds always for the IT and some special project in the district in order to equip students with knowledge skills

Finally I would recommend my fellow students to go to Nwoya District in northern Uganda for their IT and study trips since they have very many farms

In conclusion, my internship objectives were fairly achieved into practical performance I got more practical skills provided by my field supervisor and doing daily activities where I had good attitude towards agriculture.

CHAPTER ONE

INTRODUCTION

What is IT?

IT means industrial training where students undergo and expose themselves to new skills and knowledge practically in the field under the guidance of Supervisors of various disciplines within the Institute.

Preparatory arrangement

I began by submitting in my acceptance letter together with a hand written application to the office of the Director of Human Resource Nwoya District Local government and District Production Research and Development Institute for record keeping. After the orientation, I started with a brief historical background and location of the Organization (Anaka Sub-County).

Justification of the internship

This is done especially to expose students to the problems they may meet in future so that they know how to handle /overcome the problems appropriate never done before.

Objective of industrial training (internship)

To introduce students to different knowledge and skills already tacking in class theoretically into real problems solving.

Historically background of Nwoya District Local Government

Nwoya district is a district in Northern Uganda like most districts in Uganda. It is named after its main municipal, administrative and commercial center, Nwoya. The location of the District Headquarter (Anaka Town Council)

Nwoya district is one of the newest districts to the North. Gulu District to the North East, Oyam District to the Kiryandongo District to the South East and Masindi District on the south. Nwoya district administrative commercial center in the district.
