## ABSTRACT

Ngetta ZARDI hosted us (students from Busitema University, Arapai Campus) FOR industrial training which started from 28<sup>th</sup> Feb to 22 April and completed well. This written report has activities carried out during the training and this activities covers all the chapter in this content and the activities includes; Orientation, to make the student know the area of the institute and to know various units within Ngetta ZARDI, orientation also helps a students to interact with their fellow students from another institutions and the staff as well before the start of the training, description of the attachment as stated in chapter two and the description is on Agroforestry which involved raising seedling in the nursery bed and planting of the tree, during the training we did some activities under Agroforestry like mixing the soil, budding grafting and many others. Aquaculture is also one of the activity done during the training and under aquaculture we did slashing around the fish pond, adaptive research is also one of the attachment during our training and field marking and planting of the pigeonpea was also one of the activities I did during the training, livestock, horticulture, goat unit, germplasm, and dairy unit were among the attachment given during the training I also experience some challenges which include long distance limited cooperation among the students, poor time management lastly chapter explained conclusion and recommendation, I concluded that the industrial has been so beneficial to me and made me develop a lot of skill and knowledge in; budding, grafting, disease identification and horticultural training among others, in recommendation, the institute should renovate the remaining building like the crush, sparing race dip tank among others but this training made me gained a lot of knowledge and I have no doubt for any extension activities since I have been doing a lot at the institute.

## **CHAPTER ONE: INTRODUCTION**

After completing the course, there is need for internship or industrial training. The industrial training is the study where students go to expose themselves to the field for practical activities after learning theory from class students carry out practical activities like treatment of animals, deworming and spraying, pruning, budding, raising seedlings in humidity chamber, demonstration in the garden to mention but a few. This IT starts on the 28<sup>th</sup> Feb to 22<sup>nd</sup> April.

### **OBJECTIVES OF THE TRAINING**

- To get the chance of acquiring professional behaviors and attitude.
- To get chances of trying out our skills like interviewing farmers and teaching them
- To acquire skills and knowledge of socializing with farmers in the outside communities.
- To acquire related theory, we learn from class to practical
- To get train on personal effectiveness

### **HISTORICAL BACKGROUND**

The historical background states that Ngetta ZARDI has been construction in 1930's during the past World War II period, the institution was used as a resettlement and orientation site for war veterans; in 1930's, the colonial government gave it to the department of agriculture for the purpose of training farmers on the better farming practices. After independence, the government upgraded it to District Farm Institute (DFI) under the ministry of agriculture. Till 1999, when 165 ownership and management changed from DFI to Ngetta Agricultural Research and Development Centre (ARDC), In 2006, the name changed from Ngetta Agricultural Research and Development Institute (ZARDI). The institute has a land of 221 hectares (550 acres) while the satellite station has a land of 70.8 hectares (175 acre) though the communities around has encroached some part of the land,
