ABSTRACT

This report is about the industrial training that was conducted in Arapai farms found in Busitema university Arapai campus, it was done for 10 weeks (may 21ST/2018 –July 27th/2018). It was carried out weekly i.e. (mon-fri) and was done on both crop and animal sections where various activities conducted in the sections named above i.e in crop section the activities include pruning, weeding, planting, spraying, green house establishment, soil steaming, bagging of soils, marketing of vegetables and in animal section, the activities include cleaning animal houses, repair of animal houses, disease investigation, treatment of sick animals, spraying the animals to control parasites, feed formulation, e.t.c .

This has equipped me with a lot knowledge and skills mostly in practicals both in animal and crop sections , I am now in position to transform communities with improved agricultural methods.

1.0 CHAPTER ONE:

1.1. INTRODUCTION.

1.1.1 BACK GROUND.

Arapai College started in 1952 and the course levels offered were certificate and diploma only, in 2010 is when Busitema university took over from Arapai agricultural college is now called Busitema university Arapai campus.

Busitema University is found in Soroti district, Arapai sub-county, akakai parish, it is found along Soroti-Moroto road.

1.1.2 OBJECTIVES.

There are many objectives Busitema university Arapai campus has and they include:

To make the students to be able to apply the practical knowledge/skills taught in class theoretically from the first year up to date before exposing students to the field full under his/her own supervision.

To test student relation and interactive/communication power with the famer and the community around him/her as well as time mgt for commitments for the assigned duties in order to achieve further performance.

To acquire new knowledge and skills.

To prepare the students for future experiences in the field.

To improve on data collection procedures.

To further appreciate the use of the theory learnt in class as applied in the field.

To enable the students to learn from the challenges and demands of work places.

To enable the students to be able to work with the community in sensitive programs of Agriculture.

1.1.3 MISSION

To provide high standard training, engage in quality research and outreach for socio economic transformation and sustainable development.
