ABSTRACT.

This report contains information on farm and community practice that I undertook for a period of ten weeks between 28th February, 2022 to 6th May.2022 at Agency for Community Empowerment Nebbi district with an aim of acquiring hands-on skills and experience in farming and community practice to get exposed to various farm enterprises and cultural beliefs, behaviors and norms of the community.

While in the field I participated in number of activities that is; training on good agronomic practices of Bean, Cassava and onion, training on Saving with a Purpose, preparing Onion planting materials, Nursery bed establishment for horticultural entity, group conflict resolution, field monitoring. The methodology used were; Recording, Observation, Interviewing and demonstration. I learnt the following lessons; How to set demonstration garden using Pythagoras theory ($a^2+b^2=c^2$ where $a=3$, $b=4$ and $c=5$), data collection and management, coffee processing using hurling machine, honey processing using honey extractor. Below are some of the key skills attained; Riding, Communication and community dialogue, training and coaching.

In conclusion, the industrial training was successful though I encountered some few challenges; Poor Road network, unpredictable weather, poor attendance of meetings and trainings by the farmers, late coming of farmers for the meeting, limited time for internship, long distance.
