## ACKNOWLEDGEMENT

As God is the giver of everything, special thanks go to the almighty God for the gift of life, wisdom, courage, knowledge and sound mind during the internship training period.

In a special way I do thank the entire staff of Kaberamaido Sub-county most especially the field supervisor, Ajilo Jesca and Aliano Jane the SACAO Kaberamaido Sub-county, for the stewardship and guidance during the training, CAO Kaberamaido District for offering me the internship placement. May the Almighty God reward you all in your various capacities and also the entire Local Council members for their holistic support during the internship period.

Also, special thanks go to the loving and caring lecturers of the great Busitema University, Arapai campus especially the lecturers of Faculty of Agriculture and Animal Sciences who worked tirelessly to see me through this course.

Lastly special thanks go to my family members, remarkably my parents, grandparents and everyone who supported me during my course in Busitema University.

May the ALMIGHTY GOD bless you all immensely and continue giving you more wisdom and knowledge for the rest of years to come.

## **SUMMARY OF THE REPORT**

This internship report was compiled during my industrial training that lasted for 8 Weeks in Kaberamaido Sub-county in Kaberamaido District. The Sub-county provides a public service by taking services closer to the community. My activities during the internship were in line with government programs and included; vaccination of animals, agricultural extension service delivery, implementation of parish development model and microscale irrigation program. The experience, knowledge and skills gained during my internship have made me understand the relationship between class room lectures and dynamics of extension service delivery. The exposure during the internship has also prepared me for employment and has enabled me build a robust net-work with different professionals in the eight departments in the Sub county and Kaberamaido District. The challenges faced during the internship were addressed with support from the Sub-county technical staff and political leaders who were willing to mentor and support me.

## **CHAPTER ONE**

### **INTRODUCTION**

#### **1.1 Background of Kaberamaido Sub County**

Kaberamaido Sub County is one of the nine lower local administrative units in Kaberamaido District Local Government that was carved out of Soroti District in 2001. Kaberamaido Sub-county was initially founded in the year 1909 during the colonial era and was under Lango District having Mr. Byekwaso as its first Sub-county chief. In 1914 Rwot Easingu Edward replaced Byekwaso in 1914 as a Sub-county chief. However, the Sub-county Chief from 2021 to date is Aliano Jane who reports to the Local Council III chairperson and Chief Administrative Officer.

Kaberamaido Sub-County is predominantly occupied by the Kaman tribe. Other tribes that have settled or are living in the area include the Iteso, Langi, Bagisu, Baluli and Bakenyi many others.

#### **1.2 Geographical and Physiographical description**

Kaberamaido Sub-county is situated 72Km west of Soroti town and is located centrally in kaberamaido district. Kaberamaido Sub-county surrounds Kaberamido Town Council and it borders Aperikira Sub-county in the East, Alwa Sub-county in the North, Dokolo District in the West and Kobulubulu Sub-county in the South (Figure 1). The Sub-county headquarters is located in Acilo 'A' village in Acanpi Parish, latitude; 1.7868633 and longitude; 33.1876517. The Sub-county is well endowed with wetlands including lake Kyoga at the southern part and, has fertile soil and a favorable climate that supports Agriculture.

#### **1.3 Economic Activities**

The main economic activity employing over 95% of the Sub-county population particularly women and youth is Agriculture. The main crops grown for both home consumption and income generation are; maize, sorghum, finger millet, beans, soya beans, cowpeas, cassava, sweet potatoes, simsim, sunflower and cotton. While the commonly reared animals include cattle, sheep, goats, poultry and pigs. However, some farmers are engaged in apiculture and fish farming as well.

#### **1.4 Administrative and Human resource**
