DEPARTMENT OF WATER RESOURCES AND MINING
ENGINEERING**

**WATER RESOURCES ENGINEERING FINAL YEAR
PROJECT REPORT**

**ASSESSMENT OF THE GROUNDWATER
VULNERABILITY TO POLLUTION.**

Case study: Pallisa District.

APPROVAL.

This is to certify that this project report was written by BOTI NALAPA FESTO, REG. NO. BU/UP/2014/599, under the guidance of my supervision on the topic “**ASSESSMENT OF THE GROUNDWATER VULNERABILITY TO POLLUTION**” and is now ready for submission to the department of Mining and Water resources engineering of Busitema University.

NAME: MR. KAJUBI ENOCK.

ABSTRACT

This report shows how DRASTIC model techniques were applied in assessing groundwater vulnerability in Pallisa District. Groundwater pollution has emerged as a major economic, social and environmental problem in Pallisa district. The best way of dealing with groundwater pollution is to take appropriate measures to arrest leaching of pollutants especially in vulnerable areas. This requires a prediction system for areas with high pollution potentials based on scientific inputs. Geographical information system was used to generate GIS based vulnerability model parameters to obtain vulnerability index map for Pallisa district. The software used different inputs such as the soil data, land use data, water well data, Rainfall data, slope data and lithologic data. Water quality analysis was also carried out to characterize groundwater quality

TABLE OF CONTENTS

DECLARATION.....	2
APPROVAL.....	3
ABSTRACT.....	4
LIST OF FIGURES.....	7
LIST OF TABLES.....	7
LIST OF ACRONYMS.....	8
1 CHAPTER ONE: INTRODUCTION.....	9
1.1 Background of the Study.....	9
1.2 Problem Statement.....	10
1.3 Objectives of the Study.....	10
1.3.1 Main objective.....	10
1.3.2 Specific objectives.....	10
1.4 Purpose of the Study.....	10
1.5 Scope of the Study.....	11
2 CHAPTER TWO: LITERATURE REVIEW.....	12
2.1 Description of water quality parameters.....	12
2.2 Hydrologic Model Selection.....	15
2.2.1 Calibration of hydrologic models.....	19
3 CHAPTER THREE: METHODOLOGY.....	20
3.1 Study Area Description.....	20
3.2 Data collection and sources.....	20
3.3 Characterizing the groundwater quality.....	21
3.4 Tracing different sources of pollution.....	23
3.4.1 Aquifer Vulnerability Mapping Using DRASTIC.....	23

3.5	Development of groundwater protection interventions.....	26
4	CHAPTER FOUR: RESULTS AND DISCUSSION.....	27
4.1	Results.....	27
5	CONCLUSIONS AND RECOMMENDATIONS.....	37
5.1	Conclusions.....	37
5.2	Recommendations.....	37
	REFERENCES.....	38
	INDICES.....	40

Fig 3.2: Drastic model processes.	24
Fig 3.3 Groundwater protection approach	26
Fig 4.1: Multiplication of rate and weight of depth to water table map	28
Fig 4.2: Multiplication of rate and weight of net recharge	29
Fig 4.3: Multiplication of aquifer media rate and weight.	30
Fig 4.4: Multiplication of Soil media rate and weight	31
Fig 4.5: Multiplication of rates and weight of topography.	32
Fig 4.6: Multiplication of rates and weight of vadose zone.....	33

LIST OF TABLES.

Table 2.1 Characteristics of Hydrologic models.....	15
Table 2.2 Description of DRASTIC parameters and DRASTIC original weights.	18
Table 3.1 Data collection and sources	20
Table 3.2: Sampling procedures used.	21
Table 3.3: Ratings and weights used for the different parameters.....	24
Table 3.4: Vulnerability classes and percentage ranges.	25
Table 4.1: Water quality test report/results.....	27
Table 5.1:Characteristics of Groundwater and percentage coverage in Pallisa.....	37

LIST OF ACRONYMS.

MODFLOW	MODular Three-dimensional finite-difference groundwater FLOW.
GSFLOW	coupled Ground-water and Surface-water FLOW
GWM-2005	GroundWater Management process for MODFLOW-2005
DRASTIC	Depth to water, Recharge, Aquifer media, Soil media, Topography, Impact of vadose zone media, hydraulic Conductivity
GIS	Geographic Information System
SEEPAGE	System for Early Evaluation of Pollution potential from Agricultural Groundwater Environments
HDL	High Desirable Limit
MPL	Maximum Permissible Limit
UNICEF	United Nations International Children's Emergency Fund
SSURGO	Soil Survey Geographic database
MWE	Ministry of Water and Environment
NPS	None-Point Sources
DWRM	Directorate of Water Resources Management
NARO	National Agriculture Research Organization
FAO	Food and Agricultural Organization
THF	Tetrahydrofuran
IBDG	Inverter-based Distribution Generations
