ACKNOWLEDGEMENTS

I acknowledge the almighty God who has given me the strength and will to pursue this study.

My special appreciation to my supervisor Mr. Esuku Joseph and other Lecturers in the department of Economics and management who took effort to guide and advise me during the entire period of my report writing.

A special gratitude I give to my Uncle and guardian, who has struggled so much to see that I can become someone with both moral and financial support long live uncle if it hadn't been him, my education would have ended at the lower level, God bless you daddy. I am also indebted to my parents for all their invaluable support and encouragement.

To my registrar, your contribution in stimulating suggestions and encouragement is forever going to guide me in my accounting career path, thank you sir.

ABSTRACT

The study examined the effect of credit financing on the financial performance of small and medium scale enterprises in Pallisa Town Council. The objectives of the study were to determine the effect of long term loans on the financial performance of SMEs; to determine the effect of short term loans on the financial performance of SMEs and to determine the effect of trade credits on the financial performances of SMEs. The study used a descriptive research design with a population of 75 SMEs and a sample of 63 were drawn from financial services, wholesalers, contractors and ICT and a questionnaire was employed in the collection of data. The findings showed that there was a positive effect of long term loans on financial performance at ($r=.420$; $F=12.409$; $p< 0.05$), short term loans on financial performance at ($r=.293$; $F=5.465$; $P<0.05$) and for trade credit at ($r=.463$; $F=15.835$; $p< 0.05$). This implies that there was a positive effect of credit financing on the financial performance of SMEs in Pallisa Town Council. Therefore, the study recommended that improvement on the financial performance of SMEs relies on access to long term loans, short term loans and trade credit.
